

GRP-Insulating Panels

polyester coatings – glass fibre reinforced

The solution for all rooms
which have to be wet-cleaned

Cold storage room for delicatessen. Totally equipped with GRP- Insulating Panels by ECP.

GRP-Insulating Panels by ECP meet most severe hygienic directives

GRP-Insulating Panels by ECP are prepared to meet even most severe hygienic directives effective for rooms where food processing takes place.

They adhere to the respective EU directives or the food processing industry and crafts.

The outcome:

GRP-Insulating Panels by ECP are extremely appropriate for use in cold- storage and processing-rooms for food production: butcher's shops, bakeries, dairies, sausage-, meat-, fish- and vegetable-processing and so on.

GRP-Insulating Panels by ECP are damp-proof and corrosion-resistant.

Daily cleaning with water and detergents as well as permanent or frequent dampness ask for highest quality standards in ceiling- and wall-panels.

GRP-Insulating Panels are damp-proof and totally corrosion-resistant, mold resistant and durable.

The outcome:

The bright, even surface of GRP-Insulating Panels, which is easy to clean, are not only acknowledged by the builder- owner but they are also totally accepted by the supervising authorities.

Further advantages:

- quick, simple and cheap mounting
- easy to repair in case of damages, visually and hygienically perfect
- high insulation threshold value
- can be manufactured in great length, so the amount of joints can be reduced
