

EasyCrashStop

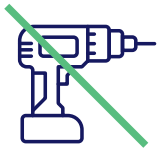

Impact Protection Strip

A 5 mm thick GRP strip designed to be installed at specific heights to prevent impact and collision damage (e.g., from handcarts).

The **EasyCrashStop** is an extension of the **EasyClean-Pan®** range and meets the same high standards of hygiene and durability.

Simple adhesive installation

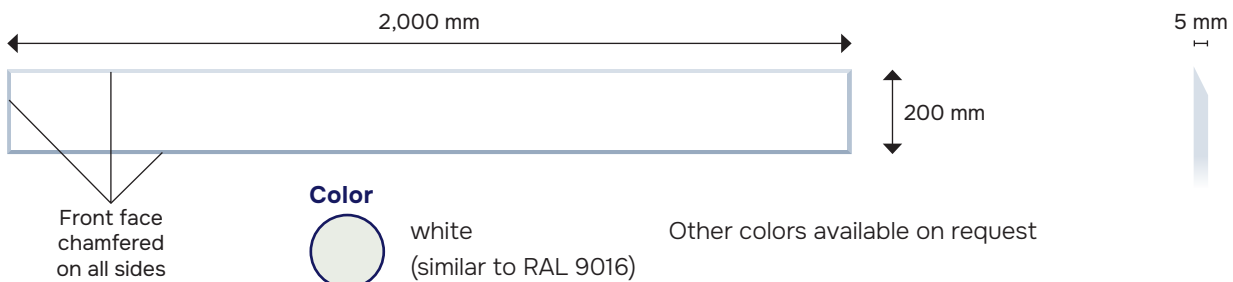

Temporary fixation using adhesive tape;
final attachment with 1C assembly adhesive.

KL 25 Hard Joint

The seal between the impact protection strip and the wall is carried out using the proven **KL 25 Hard Joint**, allowing EasyCrashStop to also meet the highest hygiene standards and enable easy cleaning.

Dimensions

Note

EasyCrashStop can only be installed if the wall to be covered also uses **KL 25** as the joint system!

Components

Material

- Glass fiber reinforced plastic based on polyester resin with gelcoat surface finish
- Smooth, even surfaces, dirt-repellent, easy to clean

Mounting accessories

- Adhesive tape for initial fixation to the wall
- 1C assembly adhesive for permanent fixing
Edge sealing / adhesive joint sealing
