

EasyCrashStop

Impact Protection Strip

- 5 mm thick FRP strip for targeted protection against collision and impact damage
- Effective protection for wall surfaces in high-traffic areas
- Extension to the EasyClean-Pan® system
- Meets the same high standards of hygiene and durability

Simple adhesive installation

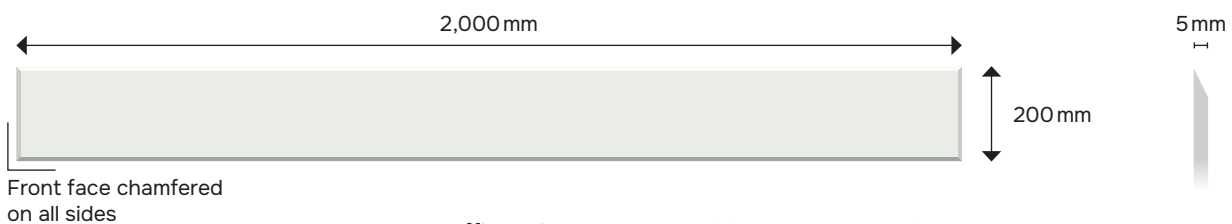

Temporary fixation using adhesive tape;
final attachment with 1C assembly adhesive.

KL 25 Hard Joint

The seal between the impact protection strip and the wall is carried out using the proven **KL 25 Hard Joint**, allowing **EasyCrashStop** to also meet the highest hygiene standards and enable easy cleaning.

Dimensions

Farbe: traffic white
RAL 9016

Additional colours available on request

Not for use with plastic profiles

EasyCrashStop can only be installed if the wall to be covered also uses KL 25 Hard Joint as the joint system!
